AS THE NEWS BREAKS

[By Associated Press.]
Austin, Tex., July 1.—Six companies of infantry in the Texas National Guard are in danger of being mustered out of service, Captain Collis H. Hall, U. S. A., inspector-instructor of the national guard, having reported they failed to come up to standard at a recent inspection. Governor James E. Ferguson has recommended re-inspection, however, before final action is taken. The companies named are Company B, Second Infantry, San Antonio; Company K, Fourth Infantry, El Paso; Company L, Fourth Infantry, Fort Worth; Company I, Fourth Infantry, Waco; Company G, Second Infantry, Temple, and Company H, Second Infantry, Taylor. Even should these companies be dropped, it would not affect the federal allotment for Texas National Guard.

Austin, Tex., July 1.—Internal revenue collections in Texas during June will aggregate about \$1,500,000, according to A. B. Walker, collector of internal revenue. The fiscal year ended yesterday, and penalties will have to be paid on taxes allowed to run over.

Fort Worth, Tex., July 1.—The cornerstone of the new school building at the Masonic Widows' and Orphan's Home, near here, will be laid Monday afternoon July 5th with appropriate ceremonies. It was estimated the building when completed and furnished, will cost \$75,000. Masons also were to open here today an employment bureau to furnish employment to lodge members in Tarrant county.

Dallas, Tex., July 1.—Starting today the United States postoffice department has put into effect a plan whereby persons residing in the rural districts and points remote from postal savings banks may do a banking business by mail. Persons living beyond the present limits of a postal savings bank may become depositors by making application through their postmasters. When an account has been started remittances may be sent by mail.

Oklahoma City, Okla., July 1.—The new State game laws, which limit the hunting season somewhat compared with the previous law, and which also cut down the bag limit, became effective today. There is a provision in the new law under which propagation of fish and game may be undertaken, and the sale of such propagated fish and game is permitted, either alive or dead, to be used for food or for propagation.

Oklahoma City, Okla., July 1.—State Treasurer W. L. Alexander was to open today his banking department under the terms of the new law that makes the State treasury the depository of daily collections by all State departments which receive State moneys. Beginning today the State treasurer also has custody of the funds of the State school land commission.

Tishomingo, Okla., July 1.—The Tishomingo, Chautauqua was to open here today to last through five days.

Muskogee, Okla., July 1.—Sixty-nine government employees who were let out three months ago, were to return to work here today, according to announcements made at the postoffice.

ACT QUICKLY.

Delay Has Been Dangerous in Bryan.

Do the right thing at the right time. Act quickly in time of anger. In time of kidney danger Doan's Kidney Pills are most effective. Plenty of evidence of their worth. Mrs. J. H. Clements, Caldwell, Texas, says: "My kidneys began to trouble me and my back became so painful that I could hardly walk. When I went to bed at night I could not get much sleep and it was plain to be seen that my kidneys were weak. A tired, languid feeling clung to me for days and I was miserable in every way. After taking a few doses of Doan's Kidney Pills I began to notice improvement, and before long the backache left."
Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Clements had. Foster-Milburn Co., Props., Buffalo, N. Y.

Remember Golden Hair and the Three Bears? And Tiny cub who with her his porridge shares?

THE WEATHER

Temperatures at Bryan for 24 hours ending at 8 a. m., this morning: Highest 100 degrees, lowest 74 degrees.

Forecast until 7 p. m., Friday: Tonight and Friday unsettled; probably showers.

Summary of weather and crop conditions in cotton region for week ending June 25, 1915:

Washington, D. C., June 25, 1915.—In the cotton belt as a whole the weather continued favorable, although heavy rains again occurred in portions of Oklahoma and Arkansas further delaying needed cultivation and the nights were too cool to permit the best results in the Carolinas and Tennessee. In the central portion of the belt and in Florida good rains occurred at the close of the week, which will be beneficial. In the southern half of Texas the drought is becoming severe, but cotton apparently is not yet suffering. The soil weevil also increasing in some sections, but no serious conditions are as yet indicated. Blooming and fruiting are becoming general and, on the whole, the outlook continues promising. Large shipments of fruit and melons from the southern trucking districts are in progress.

NEW YORK DAY BY DAY.

By CHARLES HENRY ADAMS.

Women Shouldn't Undercut Wages of Men; Often Excusable When They Do, Says Expert.

New York, July 1.—A public school training for self-support.

A shorter working day.

A minimum wage, to be determined by a conference of employers and employees.

Wages and advancement to be based on competence and not on sex.

The right to self-development through organization.

Neither compulsion to wage earning nor prohibition against wage-earning after marriage.

There you have outlined the square deal for the working woman as Miss Alice Henry understands it. For four years Miss Henry has been the editor of Life and Labor, the official publication of the National Women's Trade Union League. Her book, "The Trade Union Women," will shortly be published. There could probably be selected no more authoritative spokeswoman for the millions of her sex industrially employed in the United States.

"As our homes are now organized, what can the modern girl find to do, if she does not take up some outside activity? We know that the daughters of the rich must choose between idleness and some sort of social work. Suppose that a laboring man could afford to keep his four grown daughters at home. What useful labor could they find with which to occupy their time?"

"The reason why so many married women are in industry is because their husbands are underpaid. It's not often that a woman leaves her baby for the factory unless she is compelled to do so. I think that this economic compulsion is unquestionably bad. On the other hand, I do not think that either law or prejudice should bar the married woman from part-time work in a business or a profession provided her children do not suffer."
